PROCEDURE:

My pet was last fed at(Time and Date)

Is your Pet currently on any medication? Yes No (If yes, what are the current medical conditions?)

Details

Has your Pet had any of the following health concerns? Coughing Vomiting
 Diarrhoea Change in Appetite / Drinking Other

For Procedures, Anaesthesia, and/or Surgery, the following statement needs to be authorised:

I understand and acknowledge the following:

- I understand, authorise and request that the advised procedure is carried out.
- All procedure (especially more complicated, non-routine procedures) may result in unexpected complications and outcomes.
- If unexpected complications or an anaesthetic emergency occur, the situation will be assessed and further treatment options will be discussed as soon as is reasonably possible with me. Any further treatment costs will be my responsibility, either during or following the procedure, either by my Veterinarian or a Veterinary Specialist.
- I also give permission for the Veterinarian to use human medicines on my animals if animal licensed drugs are not available.
- The procedure, together with possible risks and potential complications, as well as the expected outcome, has been explained to me.

Pre Anaesthetic Blood Tests.

We perform a full physical examination before administering anaesthesia. A pre-anaesthetic blood test is highly recommended to reduce the anaesthetic and surgical risk and helps us rule out pre-existing internal problems that may not be evident physically but could lead to complications.

- Please perform the pre-anaesthetic blood test, if abnormalities are found you will call and inform me, cost for testing 8 parameters \$87.
- I have decided not to have the blood test performed and accept the increased risk, I request you continue the anaesthetic and surgical procedure.

Does Your Pet Need Any Other Treatment Today? Vaccination Flea / Worm
 Anal Glands Microchip Nail Clip Grooming
